

# Risk Assessment

ID	Description	Responsibility	Likelihood	Impact Level	Response
1	Loss of data on Mac	Developer	Medium	Extreme	Store everything in the cloud as a back-up using GitHub
2	Loss of data on GitHub	GitHub	Low	Extreme	Have local offline backups and other cloud systems such as google cloud
3	Non-functional main branch	Developer	Medium	High	Use FBM version control to make sure that the main branch is always functional
4	Desktop breaks down during project	Developer	Low	Extreme	Have a second device that can be used in desperate times if needed
5	Not enough time to finish the project	Developer	Medium	High	Have a timeline that ensures that there is MVP deliverable ready to go
6	Not enough knowledge in certain topics while working on a project	Developer	Medium	Medium	Use QA community, internet resources and ask the trainer for help if needed
7	Internet goes offline	Internet provider	Low	High	Make sure to contact the provider and get it up and running ASAP, use phone to establish a data connection. Have offline notes that can come in handy if needed
